Bear Creek Lumber offers all of the above products for sale. These are either in inventory or readily available. Some products must be custom milled. There is an additional charge for milling in these cases. Some products can be pre-stained or fire-treated. Bear Creek Lumber can make these arrangements for you. Products not listed may also be available by special order. Custom milling and special order product orders usually involve additional time to be processed. *Six to eight weeks after receipt of funds is a common time frame for special/custom orders.* Bear Creek Lumber does not offer a price list but is happy to quote on any materials list as a package or on any individual product. We can also quote on optional packages which compare species or patterns. Monthly specials are listed online from www.bearcreeklumber.com and in our monthly newsletter.

Bear Creek Lumber

Unique as its home in the mountains of North Central Washington State, Bear Creek Lumber is a delicatessen of fine quality lumber products. Our company offers hard-to-find and historical products that allow a customer to match or duplicate the beauty of wood products of long ago, or create an innovative new natural look.

Worldwide Service

Builders, homeowners, and architects are provided with access to the highest grade materials with direct delivery to almost any destination around the globe.

Naturally Rot Resistant

Bear Creek specializes in the lumber species that are resistant or highly resistant to decay, bug infestation and weather. These include the Western cedars and cypresses, Douglas fir and Redwood. Bear Creek lumber also has a limited quantity of tropical hardwoods.

Virtual Showroom

Since 1977, Bear Creek Lumber's family owned and operated lumber company has been providing its customers with the best products and service. Our worldwide reputation for excellence is matched by a world class web site www.bearcreeklumber.com and monthly newsletter (TIMBERLINE) that keeps customers informed about the company and offers a virtual showroom of its products.

Bear Creek Wood Products Western Red Cedar

Both beautiful and durable, western red cedar is the economical of the naturally long lasting woods. Its in-grown preservative allow it to absorb moisture without rot. It is light, split resistant and strong. A natural insulator, its mixture of light and dark toned woods ranges from a reddish brown to a light yellow. It is ideal for siding, decking, and interior paneling, as well as fences, outdoor timbers, beams and fencing.

has a uniform grain. as seen in the picture above.

Port Orford Cedar (Oregon Cypress)

Found only in a small stretch of southern Oregon, Port Orford Cedar is not only rare, it is highly prized for both its beauty and its scent. This hard and very durable wood has a cinnamon like aroma. In the Orient, it is used in temples, and for other sacred purposes. In construction, it is used for decks, interior paneling, timbers, and fencing. Its white color is offset by streaks of brown. It is available in all grades but has a very limited amount of clear grade material available.

Western woods, especially in small quantities.

Douglas fir

Considered to be the strongest of all the Western softwoods, Douglas fir has limited resin and very straight grain. It is the preferred timber and beam product. Along with its hardness, it has excellent nail holding qualities. It is also a very good choice for an economical flooring. Its orange toned heartwood mixes with the more yellowish sapwood to create a nice warm feel to a room. It can also be used as paneling, trim and for doors. Bear Creek

Lumber also inventories reclaimed Douglas fir timbers which can be remilled into flooring or into beams.

Alaska Yellow Cedar (Pacific Cypress)

Yellow cedar is a relatively rare wood found in Alaska, Washington state and British Columbia, Canada. Highly decay resistant, it is one of the most durable and hard cedars in the world, with a relatively low shrinkage volume. Its strength, freedom from splinters and excellent wearing properties make it useful for any application where exposure and heavy use are a concern. It is particularly popular in tropical climates because it is basically termite proof. In those climates, it can also be used as a framing material. Light and butter colored, it

Pricing

Bear Creek Lumber does not publish a pricelist.

All orders are quoted from the customer's construction material list, which can be sent to Bear Creek's customer service (CS) desk as a quote request. Our CS department can answer your questions and if you are in need of pricing, will refer you on to a salesperson. To expedite this process please have the following information available before you make your request:

- Product Species
- Product Size, including lengths if specified lengths are needed, and number of pieces
- Product Grade
- Footage Needed (can be square footage, lineal footage or board footage)
- Shipping Destination (city, state, zip)

If you are unsure of any of these lumber specifications, our sales or CS staff can offer you a variety of choices to work with. When you have made your final decision, they will send you a Purchase Agreement (PA) which must be signed by you before any lumber can be shipped. Carefully review the Purchase Agreement, before signing, to make sure that the product and terms are what you need. In addition to the signed PA, Bear Creek Lumber requires full or (with credit approval) partial prepayment, prior to shipment. All partial prepayment orders must be paid in full (C.O.D.) upon delivery. We advise our customers that full prepayment is the fastest route for shipping their orders. It saves us time and saves you money, since there are C.O.D. fee's that start at \$45, depending on the amount to be collected. BCL now accepts credit cards, along with checks, and all other traditional forms of payment.

How long will it take to get my order?

In-stock items can be shipped within 30 days of payment. Custom milling requires 45-60 days, and at some times of the year possibly longer. Customers with Fall and Spring orders may want to arrange shipping ahead of time, since those are the busiest shipping periods of the year. Bear Creek Lumber will hold your lumber package at our plant with a deposit, and we will ship when you are ready for the receipt of that order. Many customers will purchase materials ahead of schedule to hold special price levels, if they know what they need in advance. Sometimes products will take longer than anticipated to process at third party sites.

Special Orders

About 50% of Bear Creek Lumber's sales are custom orders. Bear Creek Lumber makes every effort to work with the customer on their special needs. Custom milling is available, but minimum order requirements do apply.

COVERAGE ESTIMATOR:

Determine the amount of material you need for the basic types of wood siding/paneling by multiplying square footage to be covered by factor (length X width X factor). Allowance for waste and trim should be added. Width of boards may vary slightly.

Product	Nominal Size	Dress	Face	Area Factor
Shiplap/Channel Rustic Siding	1 x 6	5 1/2	5 1/8	1.17
	1 x 8	7 1/4	6 7/8	1.16
	1 x 10	9 1/4	8 7/8	1.13
	1 x 12	11 3/4	10 7/8	1.10
Tongue and Groove Siding /Paneling	1 x 4	3 3/8	3 1/8	1.28
	1 x 6	5 1/2	5 1/8	1.19
	1 x 8	7 1/8	6 7/8	1.19
	1 x 10	9 1/8	8 7/8	1.10
Surfaced Four Sides (S4S)	1 x 4	3 1/2	3 1/2	1.14
	1 x 6	5 1/2	5 1/2	1.09
	1 x 8	7 1/4	7 1/4	1.10
	1 x 10	9 1/4	9 1/4	1.08

	1 x 4	3 1/2	3 1/2	1.60
	1 x 6	5 1/2	5 1/2	1.33
	1 x 8	7 1/4	7 1/4	1.28
	1 x 10	9 1/4	9 1/4	1.21

Shipping

Bear Creek Lumber can handle all freight arrangements and in many cases can deliver directly to your job site! However, you may find shipping to a nearby terminal will save time and money. Ask your salesperson for more details. Customers are also welcome to pick up their orders themselves at our will-call desk, or can make their own freight arrangements.

It is the Buyer's Responsibility to unload their order as soon as it is delivered. A forklift is often recommended.

• Small Orders

We use UPS or the postal service for the smallest orders. UPS will only accept pieces under 8 ft. long, but this is often convenient for customers looking for just a few pieces. We use common carriers for unit size loads (approximately 500 to 2,000 board feet). We ship these products to a central terminal where they are taken to destinations all over the United States.

• Larger Orders

Larger orders can save you money on shipping costs. We hire an independent carrier who hauls with a 48 ft. flatbed truck to a particular region. We ship this way about once or twice a week. Some access restrictions may apply. Please inform your salesman whether the road to your job site can accommodate up to 70 feet in length for a trucks turnaround capability. Narrow, winding and steep roads may prevent delivery. If this is the case, please advise us of your alternative delivery/unloading arrangements. Your local lumber yard will often assist you with your unloading needs.

For 5/4 -inch material multiple the area by 1.25
For 2-inch material, multiply the factor by 2

• Wrapping and Packaging

Bear Creek Lumber has been shipping products nationwide for many years. Our shipping staff is well-versed in the art of packaging for the road. Every product will be wrapped against weather and road damage with appropriate side and bottom protection. It is covered in reusable abrine (water-repellant) lumber wrap which is fully banded with steel banding. Each unit is usually weighs thousands of pounds but most commonly are 2,000 lbs in weight. **If, for any reason, you find your product has been damaged en route, note the damage on the bill of lading before signing off on the delivery paperwork. Then file the complaint with the freight company for damage reimbursement.**

• Overseas/ International Shipments

Bear Creek Lumber will containerize products for shipment overseas and/or deliver to the dock of choice. Products will be appropriately wrapped for the type of shipping they will encounter. We can also arrange for delivery in Canada and Mexico.
